

Star Art weaving

For this project you'll need:

Cardboard
Yarn
Scissors
Pencil

Instructions:

First, cut several symmetrical shapes

Cut 1/2 inch to 1 inch slits, equal distance apart all the way around the circle – the number of spokes is up to you.

Slide yarn into first slit, leaving a tail on the other side.

Begin making your way around the shape, passing through each slit several times, until you have your desired look.

Leaving enough to tie off a loop, cut yarn from skein. Tie a loop for hanging, tuck excess tail under woven pattern.
