4.4	WASH AND DRY YOUR HANDS THOROUGHLY.

GUIDELINES

1. Each Centre must have a procedure for washing sick or soiled children that uses the most appropriate wash facilities available at that Centre. For example, if a Centre has a shower it should be used. If a Centre does not have a plumbed in wash facility, an alternative may be to use a basin with wash cloths.
2. Wash down procedures are to be clearly visible and attached to the wall near the designated wash down area.
3. Information about the wash down procedure should be incorporated into introductory processes to ensure all adults are aware of the procedure.
4. Procedures must ensure that the dignity and privacy of the child is taken into consideration.
5. It is ideal to keep a "spill kit" within easy reach of the designated wash down area. A spill kit should contain protective clothing for adults (gloves, masks), items for washing the child (wipes, washcloths, towels), bags for disposing of soiled items, and bleach for cleaning the area.
6. Where possible parents should attend to their own children.
7. A record of illness should be kept, as per the **Injury, Illness and Incident Procedure**
8. If a child is unwell, they need to be isolated as per the **Sick Child Isolation Procedure** until collected.
